

## Cloud Computing Legal Deskbook, 2015 ed.

By Gregory P. Barbee, Christopher Hale, Alexander W. Major, Melinda R. Lewis

*Cloud Computing Legal Deskbook* is a compass for those who navigate the complicated intersection of law and technology – a resource for users, providers, and counselors alike.

*Cloud Computing Legal Deskbook* is a compass for those who navigate the complicated intersection of law and technology – a resource for users, providers, and counselors alike. As in many areas involving technology, the science of the cloud has outpaced the law of the cloud, creating significant risks for companies trying to make rational business and legal decisions in an environment so dominated by information technology. *Cloud Computing Legal Deskbook* helps practitioners deal with both the law and the technology by addressing numerous topics including:

- Cloud computing basics
- Negotiating cloud contracts
- Cybersecurity and the cloud
- Cloud computing project management
- Tax issues
- Intellectual property issues
- Constitutional protections of privacy in the cloud
- Employment issues
- Criminal liability
- U.S. Export and Sanctions regulations and the cloud
- General government contracting issues
- Virtual jurisdiction: Cloud computing and personal jurisdiction
- Litigation considerations: e-Discovery
- Attorney-Client privilege and related duties
- Cloud payment/banking considerations
- Mergers and acquisitions in cloud computing
- Loss of data issues and remedies for loss of data
